SUMMARY

Software Development student with experience in frontend and backend technologies including HTML, CSS, JavaScript, PHP, Laravel, C#, .NET, MySQL, and SQL Server. Passionate about problem-solving, web development, and building practical software solutions.

SKILLS

- Frontend:** HTML5, CSS3, JavaScript, Bootstrap 5, React, Tailwind CSS, Responsive Design, CSS Animations.
- Backend:** PHP, Laravel (MVC, Blade), MySQL.
- Tools:** Git, GitHub, GitHub Pages, Vercel, VS Code.

PROJECTS

- HTML · CSS · JS **Picnic Games** okashabukhari1.github.io/Picnic-Games
An outdoor and indoor games discovery website with a fully custom UI, smooth CSS animations, interactive JavaScript features and a fully responsive layout across all screen sizes.
- React · Node.js · Tailwind CSS **FureverCare** furevercare-rosy.vercel.app
Pet care and adoption platform built with React, Node.js and Tailwind CSS. Component-based UI, responsive pet listing cards, adoption profiles and live deployment on Vercel.
- React · Node.js · Tailwind CSS **Travel Smart** travel-smart-eta.vercel.app
Interactive travel guide built with React, Node.js and Tailwind CSS. Tour packages, destination pages and itineraries delivered through reusable components with smooth animations.
- HTML · CSS · JS **Head Tail Game** okashabukhari1.github.io/HeadTail
A Head vs Tail guessing game built with vanilla JavaScript. Players choose Head or Tail and compete against the computer, with live score tracking, a high score system and a responsive UI.

EDUCATION

- 2025 – Present **Full Stack Web Development** [Aptech, Karachi](#)
Enrolled in a structured full stack development programme covering HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, MySQL and REST API development.

EXPERIENCE

- 2025 – Present **Freelance Web Developer** [Self-employed, Karachi](#)
- Designed and developed multiple responsive websites from scratch for personal and portfolio use.
 - Built and deployed 4 live projects covering games, pet adoption, travel and interactive UI.
- React / Node.js / Tailwind / HTML / CSS / JavaScript / Bootstrap 5 / PHP / Laravel / MySQL

SERVICES OFFERED

Website Design & Frontend Development

Modern, clean layouts built from scratch. Responsive and mobile-first, with custom CSS animations and cross-browser compatibility.

Full Stack Web Applications

Complete web applications using PHP and Laravel on the backend paired with HTML, CSS and JavaScript on the frontend, backed by MySQL databases.

Website Fixes & Improvements

Bug identification and fixes, layout and spacing improvements, mobile responsiveness updates and general code refactoring on existing websites.
